

Information papers

- 01 eurammon – Taking the Initiative for Natural Refrigerants
- 02 Ammonia – A Natural Refrigerant
- 03 Evaluation of the Environmentally Friendly Refrigerant Ammonia According to the TEWI Concept
- 04 Assistance in Case of Accidents with Ammonia
- 05 Ammonia disposal including impact on the environment
- 06 Leakage monitoring at ammonia refrigeration plants
- 07 Technical and energetic appraisal of ammonia refrigerating systems for industrial use
- 08 Comparison of Liquid Chillers with Screw Compressor for Air-Conditioning Applications with Ammonia and R134a
- 09 Ammonia / Secondary Refrigerant System vs. Direct Evaporation of HCFCs/HFCs
- 10 Aluminium as Construction Material in Ammonia Refrigeration Cycles
- 11 Carbon-dioxide - CO₂ - R744 - (Carbonic Acid)
The History of an Interesting Substance
- 12 R-723 – An Azeotrope on the Basis of Ammonia
- 13 Components used in carbon dioxide refrigeration systems
- 14 Fit for the phase-down: the main facts and figures of the new F-Gas Regulation
- 15 Hydrocarbons as refrigerants **NEW**

The papers are available for download: www.eurammon.com
